Professional Summary

I am a 22 year old Game Designer and 3D Artist with a focus on environmental storytelling. I've played games my entire life, and since 2009, when I discovered how to make maps on Age of Empires III, I've had a passion for making them too. As a writer, I love telling stories, and as a gamemaker, I believe an environment is the best way to do that. My dream job is to work as an environment or narrative designer on an RPG.

Core Skills and Qualifications

Skills

Unity, Unreal Engine, Adobe 3D Substance Painter, Python, C#

Qualifications

2016-2021 *Highschool Diploma* from St Peters Lutheran College

2024-2027 *Bachelor's Degree in Games & Interactive Environments* from QUT

Work Experience

McDonalds: Fry Cook

09/11/2018 - 28/04/2021

As my first job, McDonalds was a fantastic starting point that taught me a lot about working in a real workplace with a real team. I typically worked there on weekends throughout high school and would cover the breakfast and lunch rushes.

Aldi: Store Assistant

06/02/2022 – 16/10/2022

My role at Aldi was a great learning experience that taught me how to work in an environment that already had very specific rules and processes in place for almost everything. During my time there, I had to complete tasks, such as stocking shelves, to a set level within a set (often short) timeframe. This allowed me to develop a great sense of adaptability and teamwork as I often had to flex across multiple roles within a single shift to help other team members.

The Lord Alfred Hotel: Bartender

23/08/2022 – 17/01/2024

I worked at the Lord Alfred Hotel as a bartender for over a year. In this time, me and my coworkers would often be serving 20+ customers at a time. This role required dedicated teamwork in order to ensure drinks and food orders were taken correctly and delivered to customers on time. My experience in this role taught me how to operate within a team in a fast-paced environment, while deftly handling external pressures such as intoxicated patrons.

Veracity: IT Service Desk Technician

23/08/2022 – Present

In my role at Veracity I work in the service desk team, taking calls and emails from clients and assisting them with an array of issues across varying fields such as printer outages, outlook problems, laptop hardware, and much more. I provide top-notch customer service with a professional and courteous approach, while ensuring that support requests are resolved or escalated within Service Level Agreement timeframes.
